SUMMARY

I'm a dedicated junior-level front-end developer. I have a good understanding of JavaScript and react.js. My experience includes making responsive website designs, developing user interfaces, and debugging.

PROJECTS

Mobixpress || **Live Projects** || **Projects Client Code** || **Projects Server Code** ||

Projects Feature:

- An individual user has the option to register themselves as either a buyer or a seller.
- A verified seller who is also an admin has the ability to add things to be sold, as well as delete any product. Admin can see all the buyers and sellers and has the ability to remove any buyer or seller and verify the seller.
- Any user who has logged in using their Google account will automatically be considered a buyer. Buyers can pay for buying a book.

Technology Used: Tailwind CSS, react-dom, react-router-dom, cors, Express, daisy UI, react hot-toast, JSON web token, firebase authentication

Legal analysis || **Live Projects** || **Projects Client Code** || **Projects Server Code** ||

Projects Feature:

- Users can log in with email and password and use their existing GitHub account.
- Users who are logged in have the ability to add services and see products. When a user logs in, they'll immediately be able to access the newly available service.
- On the home page, only three services are available. When a user clicks on the see all button he/she will be able to see all the services.

Technology Used: Tailwind CSS, react-dom, react-router-dom, cors, express, daisy UI, react-hot-toast

WebConcepts.io || **Live Projects** || **Projects Client Code** || **Projects Server Code** ||

Projects Feature:

- Both logging in and creating an account are options available here. Users can log in also using their existing GitHub and Google accounts. Logged in user will redirect to the home page automatically.
- A private route has been established in order to facilitate premium access and the blog.
- Users have the ability to switch the theme from bright to dark or vice versa.

Technology Used: react-bootstrap, react-dom, react-icons, react-router-dom, cors, express, firebase authentication
